

ANNUAL REPORT 2023-2024

SUPPORT PROJECT FOR YOUNG HIGH SCHOOL STUDENTS

Donor: Madagascar Educational Opportunities

INTRODUCTION

MEO's support for young people from very vulnerable families in the Ambalavao district continues, thanks to the NGO Ny Tanintsika/Feedback Madagascar. This enables them to benefit from a high school education. This school year, 60 students were supported; 21 in the second year, 27 in the first year and 12 in the last year. It should be noted that they study in 12 different high schools within the district (CISCO Ambalavao).

ACHIEVEMENTS

Approaches and methodology adopted

Our educational partners are involved in the implementation of the activities in various ways. CISCO (district level) and ZAP (municipality-level) participate in the selection of new scholarship holders, sign agreements and contracts for the pupils, attend the official opening meeting of the school year and intervene to resolve problems if necessary. The headmasters and teachers monitor and supervise the pupils, have regular discussions with the SSO (Student Support Officer) and the Project Manager, and provide verbal or narrative reports.

The pupils' parents also play a crucial role in monitoring and supervising their children, in particular by signing contracts, attending parents' school and talking to the project manager and the SSO. Pupils are monitored by the SSO door-to-door and at the school level. In addition, youth camps and monthly sharing meetings are organised to reinforce pupils' knowledge, skills and good manners.

Activities carried out

a. Selection of new scholarship holders

Period	Activity	Location	Results	Details/observation
28 th August to 3 rd September 2023	Shortlisted new beneficiaries	Twelve (12) pedagogical administration areas (ZAP): Ambohimahamasina, Ambinanindovoka, Anjoma, Ambalavao, Ankaramena, Vohitsaoka, Namoly,	87 candidates 38 shortlisted for a home visit	The missionaries were made up of representatives from CISCO Ambalavao and team from the NGO Ny Tanintsika. Raising awareness : Session with the CISCO about the shortlisting process; Short-listing agenda Presentation of the support project for young high school students. Explanation of the selection process. Filling in application forms. Level test : French, Malagasy and Mathematics (see attached)

		Sendrisoa, Andrainjato, Ambohimandroso (Matavy) & Miarinarivo.		Shortlisting process We noted the situation of the candidates as follows : • Level of study of candidates ; • Family situation of students ; • Ownership of cattle and pigs.
19 th to 24 th September 2023	Home visits		21 applicants	They were selected on the basis of the situation observed in the field, taking into account feedback from the donor.

b. Monthly meeting and distribution of grants in Ambalavao

Period	Activity	Objective	Results	Details/observation
28th October 2023	Opening meeting for the 2023-2024 school year	Welcome of new beneficiaries (students and parents); Official opening of the school year.	Participants present : 59 students ; 59 parents ; 9 head teachers(Andrainjato-Ambohimahamasina-Ankaramena- Anjoma-Ambinanindovoka-Matavy -Miarinarivo - Vohitsaoka & Sendrisoa); 8 ZAP chiefs (Anjoma-Ambalavao- Namoly-Ambohimahamasina-Andrainjato- Matavy-Iarintsena & Miarinarivo) 2 CISCO representatives (Head of CISCO and a pedagogical advisor)	Agenda : • Welcome of guests ; • Opening speech and introduction of participants; • Presentation of the project and its implementation during the 2022-2023 school year. The head of the Ambalavao CISCO expressed his gratitude for our support in their school district, underlining his desire to continue working with us. He emphasised the importance of this support, reminding parents of their responsibility in their children's education, while insisting on the efforts needed from students to succeed in their studies. The head of the programme presented the NGO Ny Tanintsika / Feedback Madagascar and its activities, explaining the crucial link between education and development, while asserting that there is no tolerance for corruption. At the meeting, the 12 deserving students for the 2022-2023 school year received high-quality notebooks and pens from the NGO. We also shared photos illustrating the savings made by the students to inspire and encourage other students and parents to follow their example, as well as videos of testimonials captured during the Youth Camp.

Period	Activity	Objective	Results	Details/observation
11 th November 2023	Activity 1: Drawing up a student record book	To facilitate our monitoring and introduce students to accounting.	60 students present (all students present); Students took part and the session was lively.	This booklet is structured into four sections as follows: - Part One: Studies, meetings and other activities Date Contents Observations - Part Two: Cash journal Date Description Inflows Outflows Balance - Third part: Savings Date Type of savings Sales Purchases - Part four: Correspondence Date Period of absence Reasons Signature of parents /guardians
	Activity 2: Personal hygiene	Pupils know the tricks to get rid of underarm odour		It's a sharing session on how to get rid of bad underarm odour.
	Activity 3: What do you like? What don't you like?	To welcome new scholarship holders, reduce shyness and help them express their likes and dislikes.		We found that girls are shyer than boys. The boys are almost mature.
	Activity 4: Vision and objective	Students are able to differentiate between vision and objective. Each student must have a vision and set objectives to achieve. They must integrate them into the ‘student week’ framework.		
2 nd December 2023	‘How to succeed brilliantly at school’	Students are introduced to a variety of learning methods and put them into practice	All students were present.	The participants were divided into six groups, each working on the following question in the context of an exhibition: ‘What learning methods do you find effective? After each presentation, there was time for questions and answers, allowing for more in-depth discussion. At the end of the session, the moderator gave a brief summary of the points raised.
	Vision and objectives (continued)	Each student must have the courage to dream, recognise their talents and understand the steps needed to achieve		We watched three videos highlighting the success stories of young African entrepreneurs. Each one recounted their journey, the obstacles they encountered and how they overcame them, along with advice for young people. After each screening, a sharing session took place to discuss the videos.

Period	Activity	Objective	Results	Details/observation
		their goals, thus becoming a source of inspiration for their peers.		
13 th January 2024	Subjects : - Agroforestry ; - Agroecology, - Compost; - Reforestation	Each student understands the concepts and techniques related to these themes, and they can put them into practice at home.	One student absent	Each group presented an exhibition on these subjects, accompanied by the projection of an explanatory video. The event concluded with a discussion of practical techniques.
	‘Life skills’ / Savoir vivre: ‘Mianatra mba hahay ve sa hianatra mba hifindra kilasy’ (‘Mianatra mba hahay ve sa hianatra mba hifindra kilasy’)	They focus on their studies to achieve their goals and realise their dreams. Students refrain from all forms of corruption; Students behave in an exemplary manner.		The pupils had a brainstorming session on the song by the singer ‘Tempo gaigy’: ‘ <i>Ramose mo namako o!</i> <i>Ramose mo akamako o !</i> <i>Rehefa tonga ny interro,</i> <i>Aza atao zero zero...</i> ’ . They tried to answer these questions: - What is this song about? - What does the song say about teachers? - What are the reasons why pupils go out with teachers? - What are the negative effects of going out with teachers? - What are the negative effects of buying notes from teachers? - What can be done to avoid this?
	Dictionaries for students in the second year of high school	Support for students in French and English	21 students with French-French, French-English and French-Malagasy dictionaries.	
3 rd February 2024	Know-how & manners : - During meals; - During meetings; - At school; - In the street.	Every student behaves well.	4 pupils absent	To get pupils involved, the subject was explored with them so that they really got into the swing of things.

Period	Activity	Objective	Results	Details/observation
	Recapitulation of agro ecological techniques through film showing.	To clarify the theory		Following the screening, a short assessment test was organised to measure what the students had retained. The results of the test showed that 50% of the students achieved an average score. Lucas, a first-year student at Lycée LJS, wrote the best text and gave the correct answer. Honorine (NT) urged students to pay more attention and develop better listening skills. She also encouraged the pupils from Ambohimahamasina and Vohitsaoka to visit the vermicomposting production sites there and apply it at home.
	Theme: ‘ny sakafo ara-pahasalamana’ (Healthy Food)	Students know the definition of healthy food / a balanced diet.		We explored the definition of healthy eating with the students through a question and answer session.
	Interviews with students who did not achieve an average of 10 or more	Raising awareness among pupils to encourage them to make an effort, and identifying the problems they encounter.	10 students were interviewed	Student problems identified: - Lack of revision time ; - Shyness ; - Illness (headaches); - Subject seems difficult: maths and PC
16 th March 2024	Theme: ‘ny sakafo ara-pahasalamana’ (continued)	Students are expected to eat a variety of healthy foods. Every student is aware of the importance of urban agriculture.	Two students talked about their experience of urban agriculture; A lively session; Students were interested in the topics covered; Two students absent.	We defined healthy and varied foods based on the video ‘ Sakafo maro loko, sakafo miovaova’ . We also showed extracts on urban agriculture.
13 th April 2024	Theatre and musical comedy with young English girls (The Wind-Up Penguin Group)	Awakening students' minds	Three students were absent. The students showed great interest in the theatre. Many of them were surprised,	The theatre group's show went very well. It enabled some students to try playing the violin and the ‘Karitsana’ . There was also a question and answer session in English. Some students, particularly girls, are shy around visitors, but it is

Period	Activity	Objective	Results	Details/observation
			as it was the first time they had attended a theatrical performance.	important that they take an active part in all activities, no matter who is leading them. Advice has been given to students on the issues identified in the termly report, in collaboration with the programme leader.
4 th May 2024	Visit by the MEO donors during the meeting and distribution of stipends		All the students were present and showed a good level of participation, especially the boys. They have many talents, as evidenced by the fact that all the gifts for the donors were made by them, and they were delighted to meet their benefactors. However, they are a little shy around visitors, especially the girls.	Exam techniques and tips were shared in a fun way, with rewards (notebooks and pens) given to the ten students who found the right answers. Meritorious pupils in term I and II exams also received notebooks in recognition of their efforts. During the discussions with Amanda & Danuta, a number of subjects were discussed, including the series envisaged for the second year, the branches and careers envisaged by the students after the baccalaureate, and on subjects deemed difficult, such as Mathematics, Physics, French and English. The problems encountered by each student were discussed, as was the impact of the Youth Camp. A question-and-answer session provided an opportunity to exchange ideas, followed by a photo opportunity. Suggestions for improving the programme were put forward, including the choice of Manakara as the location for the Youth Camp, visits to farms and businesses, as well as training in beekeeping and pig farming, support after the baccalaureate, and language courses (French and English) focusing on oral practice.
15 th June 2024	Collecting students' needs during the Youth camp	Activities during Youth camp will interest and benefit students	Two pupils absent	Topics suggested by students during the Youth Camp include: puberty, menstruation, personal hygiene, STDs, training courses on pig farming, poultry farming and fish farming, company visits, promoting Malagasy art, post-baccalaureate guidance, love and youth, simplified management, reforestation techniques, a visit to a historic site, sport (football and basketball), dance lessons, headaches and toothaches, endemic animals, waste recovery and processing, the use of medicinal plants, the culinary arts and entrepreneurial culture.

Period	Activity	Objective	Results	Details/observation
29 th June 2024	Closing meeting for the 2023-2024 school year		7 pupils absent	There was be a reminder of the Youth Camp programme, followed by practical advice for pupils during the holidays. A special blessing was given to students who were about to sit the baccalaureate exam. Finally, intensive revision courses, the “Faradoboka”, will be organised to prepare them as well as possible for this important exam.

c. Exchange with the parents at each school

In December 2023, our activities focused on the parents of students. We organised discussion meetings in each school to make them aware of their duties and responsibilities towards their children, with 83.33% of parents taking part. Three questions were asked during these meetings to encourage discussion: ‘How well do I know my children?’ , ‘What are my responsibilities towards my children?’ , and ‘What should I do to educate my children? Parents showed a willingness to work closely with their children to improve educational outcomes.

d. Home visits to pupils

From January to June 2024, door-to-door visits were made to students to collect data and information about their studies and lifestyle. The aim of this initiative was to provide them with support and advice to help them succeed both in their studies and in their daily lives. Each student was visited once a month, while senior students and those experiencing difficulties were visited systematically. The activities carried out during these meetings included individual interviews with each student and their parents or guardians, checking that cleanliness was respected (accommodation, personal hygiene, notebooks), evaluating the use of donations received from NT (such as dictionaries or solar lamps), documenting the students' study methods, collecting weekly sheets to analyse the use of their time and proposing an improved timetable. Discussions were also held on the use of their stipends, their time management and their learning methods, as well as raising awareness of WASH issues, eco-gestures, reproductive health, self-management and urban agriculture.

The following table presents results of these visits.

Category	INDICATOR	Number (out of 60 beneficiaries)	Percentage (%)	OBSERVATIONS
HABITAT	Rented house	5	8.33	Monthly rent: 5,000 to 8,000 Ar
	Use of charcoal	25	41.67	The others use firewood (kitay)
Water and Sanitation Hygiene /ENVIRONMENT	WC ownership	35	58.33	Shared latrines
	Use of drinking water	20	33.33	Water pump and borehole: Andrainjato, Anjoma, Vohitsaoka, Ankaramena & Ambalavao
	Shower ownership	29	48.33	Ambalavao, Ambohimahamasina, Ambinanindovoka, Anjoma & Ankaramena
	Participants in reforestation	49	81.67	Most of them have no land
	Types of trees planted by students			
	Eucalyptus	30	50	399 trees
	Fir	4	6.67	101 trees
	Acacia	2	3.33	07 trees
	Fruit tree	19	31.67	158 trees : mango, peach, avocado, orange, pibas, papaya
	Cash crop: coffee	7	11.67	81 Coffee trees
	Other	2	3.33	6 trees : grevilia
	TOTAL TREES PLANTED			477
STUDIES	Student week' (weekly timetable)	33	55,00	Others use other methods
	Subjects that seem difficult for them			
	English, French, Maths, Physics			Most scholarship holders have problems with their teachers (very frequent absences, incompetence, availability, motivation, etc.) or basic problems (level and education system).
SCHOLARSHIP	Investment self-management	43	71.67	The rest is managed jointly with their parents or guardians.
	Ownership of savings	57	95	The three scholarship holders who have no savings are Vatosoa, Tsaroana and Jocelyn.
				Savings amounts range from 80,000 to 700,000 Ariary, depending on the case and level.

	Type of savings by students				
	VOAMAMI (village savings & loans groups)	15	25.00	Rural municipalities : Andrainjato, Sendrisoa, Ambalavao & Anjoma	
	Savings bank account	1	1.67	Anita	
	Agriculture	9	15	Growing beans, groundnuts and bambara peas	
	Breeding	31	51.67	Pork, poultry, mutton, beef	
	Stock	14	23.33	Agricultural products: rice or cereals	
	Cash	4	6.67	15,000 to 700,000 Ar	
	Trade	2	3.33	Basic necessities	
	Art	3	5	Braiding and weaving (lambagasy and mats)	

e. Visits to each school

From February to June 2024, we monitored the behaviour of students in their schools, which enabled us to talk to the headmaster and teachers. In general, our scholarship holders stand out as being amongst the most deserving and well-behaved pupils in each school. In addition, a group of students from each high school organised themselves to share good practices and offer support in French, in particular through the study of texts and reading sessions aimed at improving pronunciation, vocabulary and grammar.

f. Special courses for pupils

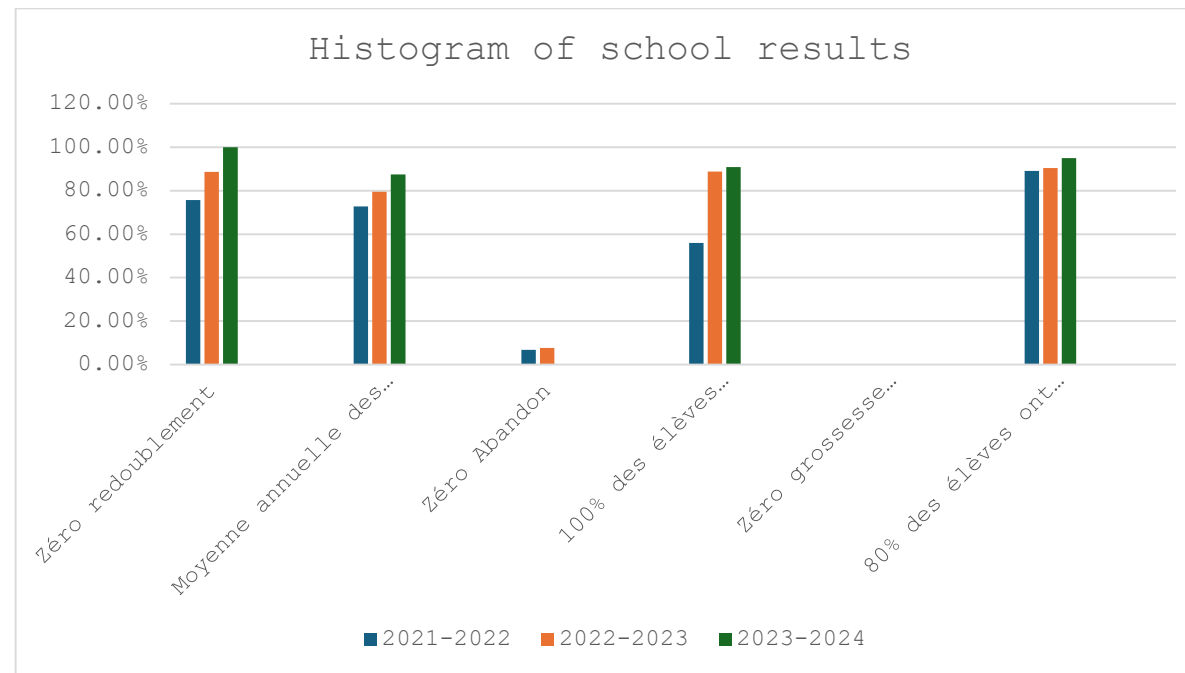

From March to June 2024, special courses were organised to improve students' level of study, including language courses (French and English) for intermediate pupils, and maths and physics courses for those in their final year. Nineteen teachers were hired, but some did not complete their work properly due to a lack of motivation or availability. It is difficult to find really competent teachers in some high schools, which means that we have to work with those who are available, even if they don't always meet expectations. During the Easter holidays, all the final-year students met in Ambalavao for a fortnight. The science Terminales focused on mathematics, life and science studies and physics and chemistry, while the literary Terminales concentrated on French, English, philosophy and history-geography. The teachers were very experienced and methodical, which satisfied the students. Two weeks before the baccalaureate, a "Faradoboka" intensive course was organised for bursary students in terminale, during which seven subjects were taught: maths, physics-chemistry, science and technology, French, English, philosophy and history-geography.

g. Youth Camp

The Youth Camp in Fianarantsoa, held from 29th July to 3rd August 2024 with two days of travel, was designed to enable young people to develop and prepare for their future after the baccalaureate. Fifty-seven students took part. The first day was devoted to the arrival of the students, followed by the official opening of the camp at the NT Office and a training session on the theme ‘I’m taking my future into my own hands’ , as well as a knitted rug-making activity. On the second day, the students received an orientation at the Francophone Employability Centre of the University of Fianarantsoa and visited a fruit drying centre in Ankidona. The third day was marked by a visit to the Bionex Company and another carpet-making session. On the fourth day, they visited a training and fish farming centre in Talata Ampano, followed by a recreational outing to the SOAFANIRY Park in Talata Ampano. On the last day, they returned to Ambalavao. The children thoroughly enjoyed the camp, highlighting the diversity of the activities and the novelty of the experiences on offer. They were also delighted to meet former students who, having gone on to study at university, shared their experiences and encouraged the participants. They asked that the next Youth Camp be held in a different location, not Fianarantsoa.

h. Results for the 2023-2024 school year

	School year		
Expected result	2021-2022	2022-2023	2023-2024
Zero repetition	75.75% of students passed	88.64% passed	100% passed
Annual student average ≥ 10	72.72% of students had average grades of 10 or more	79.54% of students had average grades of 10 or more	87.5% of students had average grades of 10 or more
Zero drop-outs	Four (04) students passed	Four (04) pupils dropped-out	Zero drop-outs
100% of students pass the official baccalaureate exam	56% of students passed the baccalaureate exam	88.89% of students passed the baccalaureate exam	90.90% of students passed the baccalaureate exam. Jocelyn completed his studies at the Soarano Ambalavao agricultural college.
Zero early pregnancies	No students became pregnant during the school year	No students became pregnant during the school year	No students became pregnant during the school year
80% of students have savings	89.9% of students have savings	90.38% of students have savings	95% of students have savings

School results improved by introducing strategies to improve working methods. This includes discussions and meetings with parents to make them aware of their duties and responsibilities towards their children, as well as presenting savings success stories to pupils and parents, and monitoring individual savings. Systematic monitoring of pupils in difficulty has also been put in place, involving exchanges with school officials such as teachers and the headmaster. Useful advice is shared at every meeting.

However, this remains unsatisfactory, as the real objective has not been achieved for a number of reasons: some pupils do not feel responsible for their failures and blame others; some parents do not look after their children, leaving them to fend for themselves; some high schools have very lax discipline, with teachers who are not very rigorous, and report cards are not compliant. What's more, the data collection tools are still paper-based, which takes time to enter and reduces the amount of time spent working with pupils. Guidance for students is inadequate. Pupils also face problems, particularly the distance from home, which makes them tired, and some have a poor grounding in the lower grades.

The majority of schools are overcrowded, despite the lack of infrastructure and teaching staff.

i. Proposal for the 2024-2025 school year

Meeting and distribution of grants:

We have not been able to carry out many activities during the monthly meeting. In addition, some children come from very far away and have to interrupt their lessons on Friday to attend the meeting on Saturday. What's more, some of them have no place to stay when they arrive in Ambalavao. As a result, we propose replacing this where possible with bi-monthly meetings. This means that the scholarship payment will be every 2 months and that the students will stay in Ambalavao for 3 days during the bimonthly school holidays. We will have to rent a flat in Ambalavao and hire a cook instead of a caterer, and the children will take turns serving the meal and washing up. We would then be able to cover a wide range of topics: support in French and English, scientific subjects, training in poultry farming, pig farming, IT, exchanges with former scholarship holders studying at university or who have succeeded in life, as well as exchanges with specialists (doctors, lawyers, entrepreneurs, etc.).

Support classes: Pupils should not be dependent on support classes. To enable activities to be carried out during the bi-monthly meeting, support classes for intermediate classes will be suspended. However, students in Terminale will have classes during the Easter holidays and the two weeks leading up to the baccalaureate. Ferdine and Fifi will do their best to help the students. We will also be working with Saunia (former MEO, now doing a Masters 2 in Physics) to support students in science subjects.

Savings: It will be specified in the contract that each student should save 10 % of their stipend, to be used for income-generating activities to generate more savings.

Ideally, bicycles should be donated to students who live far away, to reduce the cost of travelling to Ambalavao, allowing the money to be used for other purposes. Those who receive bicycles would then not receive taxi-brousse fares to attend meetings, and so this would help cover the cost of the bicycles over the course of the school year.

Youth Camp: Three different options for locations for the Youth Camp are being proposed, with preference that it be held in Antsirabe. This is where there are many businesses to visit, offering the young people sources of inspiration and opportunities for development in various fields.

Data collection: It would be good if the Support Student Officer had a tablet to make data collection easier and avoid wasting time with manual data entry.

j. Challenges and outlook

We will send a report on the progress of the project every two months to the donor. Guidance on life after Baccalaureate will begin in the second year of high school, without waiting until after the baccalaureate. The aim is to continue achieving the objective that 100% of students will pass to the next

school year, all will have savings and, above all, everyone will know the path they want to follow at the end of the three years of support, being truly independent in life. Follow-up will be provided for those who have obtained their baccalaureate.

CONCLUSION

The 2023-2024 school year has gone well, and it is clear that results have improved significantly. However, there are still many aspects to be perfected in order to achieve the objectives and expected results. We would like to express our gratitude to all the donors for their support for these young people, as it is clear that this has considerably alleviated the difficulties of the most vulnerable, enabling them to access basic education like everyone else. We very much hope that this support will continue, and we pledge to do our very best to achieve the goals that have been set. We would also like to thank the NT/FBM team for their collaboration in carrying out all the activities for 2023-2024.

SUCCESS STORIES

Meritorious students in the 2023-2024 school year

Figure 2: FITAHINASOA Nomenjanahary Sarobidy Vatosoa, in her final year of science at Lycée Joel Sylvain Ambalavao, she passed the baccalauréat exam with an average grade of 15.78, with distinction. She wants to continue her studies at the Faculty of Medicine in Mahajanga.

Figure 1: Jean Jocelyn with his uncle and Ferdine to his right, and his grandfather to his left. Photo taken during the graduation ceremony at the Soarano agricultural college. He wants to become a farmer and start breeding improved Gasy hens.

Figure 3: HERINJATOVO Emmanuel (Tovo),

He studied at Lycée Anjoma, and passed to première class with an average grade of 16.4

admitted to Terminale with an average grade of
13.18*

Various testimonies

Jean Baptiste RANDRIANASOLO, 17, from Iarintsena, was selected to receive a scholarship for the 2023-2024 school year. His widowed mother has five children, two of whom are still at school, and Jean Baptiste is the fourth. His mother, who suffers from a disability, has no stable source of income. She sells cassava-based cakes (Balamboay) and, when the price of rice rises, she prepares mofogasy (rice cakes).

Jean Baptiste studies in Ambalavao and lives with a kind-hearted person, who only pays for his food. They are very happy to receive this support, and Jean Baptiste is committed to studying seriously and persevering with his studies.

*Fidél, Year 12 at the Lycée Joel Sylvain , school
year 2020 - 2021.*

*Fidél, with its veterinary medicine sales outlet,
Amboaloboka*

After obtaining his baccalauréat, Fidél continued his studies at ISST, as he wanted to become an agricultural technician. To finance his studies, he collected veterinary medicines from his veterinary uncle and sold them, making a profit. Thanks to this activity, he manages to earn around 100,000 Ariary a month, which enables him to continue his studies. He is currently preparing his dissertation to obtain his bachelor's degree.
